

# Low Noise, Cascadable Silicon Bipolar MMIC Amplifier

# Technical Data

#### INA-10386

#### Features

- Cascadable 50  $\Omega$  Gain Block
- **3 dB Bandwidth:** DC to 1.8 GHz
- 26 dB Typical Gain at 1.5 GHz
- 10 dBm Typical P<sub>1dB</sub> at 1.5 GHz
- Unconditionally Stable (k>1)
- Surface Mount Plastic Package

#### Description

The INA-10386 is a low-noise silicon bipolar Monolithic Microwave Integrated Circuit (MMIC) feedback amplifier housed in a low cost surface mount plastic package. It is designed for narrow or wide bandwidth commercial and industrial applications that require high gain and moderate power.

The INA series of MMICs is fabricated using HP's 10 GHz f<sub>T</sub>, 25 GHz f<sub>MAX</sub>, ISOSAT<sup>m</sup>-I silicon bipolar process which uses nitride self-alignment, submicrometer lithography, trench isolation, ion implantation, gold metallization and polyimide intermetal dielectric and scratch protection to achieve excellent performance, uniformity and reliability.

#### 86 Plastic Package

#### **Typical Biasing Configuration**

| Parameter                          | Absolute Maximum <sup>[1]</sup> |
|------------------------------------|---------------------------------|
| Device Current                     | 80 mA                           |
| Power Dissipation <sup>[2,3]</sup> | 750 mW                          |
| RF Input Power                     | +13dBm                          |
| Junction Temperature               | 150°C                           |
| Storage Temperature                | -65 to 150°C                    |

#### **INA-10386 Absolute Maximum Ratings**

**Thermal Resistance:** 

 $\theta_{jc} = 100^{\circ}C/W$ 

Notes:

- 1. Permanent damage may occur if any of these limits are exceeded.
- 2.  $T_{CASE} = 25^{\circ}C.$

3. Derate at 10 mW/°C for  $T_{\rm C} > 75$  °C.

## INA-10386 Electrical Specifications<sup>[1]</sup>, $T_A = 25^{\circ}C$

| Symbol            | Parameters and Test Conditions         | Units                 | Min.  | Тур. | Max.  |    |
|-------------------|--|-----------------------|-------|------|-------|----|
| GP                | Power Gain $( S_{21} ^2)$              | f = 1.5  GHz          | dB    | 23.0 | 26.0  |    |
| $\Delta G_P$      | Gain Flatness                          | f = 0.1  to  1.5  GHz | dB    |      | ± 1.0 |    |
